OPERATIONS WITHIN TRIPOLI FIR

Please be advised that all airports in Libya are closed to international flights with the exception of El Beida (Labraq, HLLQ), Tobruk, Zwara (HLZW) and Zentan and NOTAMs may not reflect the actual situation.

International authorities have raised concerns about the safety of operations in the central and western part of the Tripoli FIR, including Zwara and Zentan and also on those ATS routes in the Tripoli FIR, north of the Libyan coastline.

ICAO has also been informed about threats published on the World Wide Web that civilian or military aircraft from one State, which might enter Libyan airspace, will be shot down.

Taking into consideration the armed conflict situation in Libya, there are possible serious risks to the safety of flights operating within the Tripoli FIR and all operators of San Marino registered aircraft are strongly urged to use this, and any other pertinent information, to assess the flight safety risk in the Tripoli FIR and at Libyan airports.

This safety notice will remain in effect until advice has been received to the contrary.

Chief Operating Officer
Dennis Michelotti
